- impact on population and employment figures
 - demographical factors
 - business cycle, e.g. unemployment during crisis
 - socio-economic factors, e.g. wage-earner vs. self-employed
 - overlapping of factors makes an analysis difficult

■ 1991-2002

| year | population (1000) | workforce (1000) | workforce / population (%) | unemployed (1000) | employed, self employed (1000) | employment / population (%) | not in the workforce (1000) | employed | | self employed | |
